

“When the Victim Is a New Immigrant or a Person With Precarious Status” is intended to assist new immigrants or persons with precarious status, who are victims of crime in Québec, in understanding the criminal justice and immigration systems, to guide them in obtaining the help and compensation they need and to support them in exercising their rights and recourses. Created by the Association québécoise Plaidoyer-Victimes, this comprehensive and practical guide includes everything that victims and people who support them need to know to navigate these two systems in an informed way. This third guide from *The Rights and Recourses of Victims of Crime series* provides victims with all the information they need.
